PROJECT SUMMARY

FOOD ORDERING APP (EdYoda Digital University)

As part of the PYTHON training course, developed a basic “Food ordering app” with minimal viable product capabilities like Admin, user login functionalities for admin privileges, account creation, updating profile, and ordering items.

Role& Responsibilities:

1. Gather requirements by working with my team.
2. As backend developer, contributed to develop modules like adding items to cart and order those Items.
3. Performed UNIT testing for the modules which I have developed
4. Given the demo to product owner and enhanced the system for the new requirements
5. Participated in all team meetings to understand product capabilities
6. Collaborated with team for various discussions related to product lifecycle.

DECLARATION
